Day - 8

More Flex properties

Recap

1. Container and Items
2. Main axis and Cross axis
3. Justify-content and align items

Topic

1. Flex Wrap
2. Flex Grow
3. Flex Shrink

Flex-wrap

Determines whether items should wrap or stay on a single line.

Values: nowrap, wrap, and wrap-reverse.

Align-content

[Flex Layout (appbrewery.github.io)](appbrewery.github.io)

Flex Grow

Specifies the ability of a flex item to grow.

A unitless number indicating the factor by which the item will grow relative to the other items.

Flex Shrink

Specifies the ability of a flex item to shrink.

A unitless number indicating the factor by which the item will shrink relative to the other items.
